About AngelX Super

We are a new-age, cutting-edge exchange platform catering to investors wide India. With a proficiency in catering to the global audience for many years, the founders of AngelX Super bring in this exchange platform that is research-backed, solely designed to satisfy the evolving requirements of Indian investors.

AngelX Super stands as a major advancement in cryptocurrency exchanges. It distinguishes itself by offering a reliable, safe, and effective setting for handling digital assets.

It's a quick and affordable platform to convert USDT to INR, ensuring that each transaction made is of immeasurable value to every investor. It allows to trade USDT on both, Tron (TRC-20) and Ethereum (ERC-20) blockchain networks. The platform further plans to introduce different cryptocurrencies, in addition to USDT, in order to offer investment diversity.

We choose a customer-focused approach wherein the investors hugely benefit from our 'no trading fees' policy. This policy assists in retaining more of your assets and avoids unexpected costs. Our streamlined method makes it quick and easy to convert the cryptocurrency, USDT into fiat money, INR, giving immediate, hassle-free access to the funds. Whether managing investments or trading for a supplemental income, AngelX Super is all about convenience to meet today's financial needs.

Founder's undertaking directed to the Indian Geographies

With a wealth of knowledge in the financial technology industry, **Alex Campillo** outshines as a visionary leader who has committed his career to serving the urgent requirements of Indian investors. Knowing how difficult it may be for people to make the most of their time and money, **Campillo** is dedicated to offering a platform that meets the demands of the modern, fast-paced world.

Under his leadership, AngelX Super is an outstanding demonstration of innovation, built to remove needless obstacles and expedite cryptocurrency trading. **Campillo**, is committed to providing customers with tools that are both simple and effective, making it possible for any investor to easily manage their financial path. His goal is to provide a setting where intelligent technology and user-centered design collide to change how investors engage with their assets and accomplish financial goals.
